- Theme: AGENTIC AI
- Team Name: SYNAPTIX
- Team Members: N G KARTHIKEYAN, T N KRISHNAVENI, T S NIGARIKA, G L KEERTHIGA DEVI

ABSTRACT

Government Scheme Navigator is an AI-powered web platform designed to simplify the discovery of government welfare schemes.

The system helps citizens:

- Find suitable schemes easily
- Check eligibility instantly
- Interact using voice or text
- Access information in multiple languages

This platform bridges the gap between **citizens and government benefits** by making scheme discovery simple, personalized, and accessible.

PROBLEM STATEMENT

Citizens face several difficulties when trying to access government schemes:

- Information is scattered across many websites
- Eligibility criteria are complicated
- Lack of awareness about available schemes
- Language barriers for rural citizens

As a result, millions of eligible citizens miss out on government benefits.

EXISTING SOLUTION

Current government portals provide scheme information but have limitations:

- Static directories without personalization
- Complex user interfaces
- No AI-based recommendation system
- Limited language support

These platforms require users to **manually search and analyze eligibility.**

PROPOSED SOLUTION

Government Scheme Navigator

An AI-powered platform with four main features:

- **AI Assistant** – Conversational chatbot for scheme guidance
- **Smart Eligibility Engine** – Calculates eligibility based on user details
- **Scheme Directory** – Organized database of government schemes
- **Personal Dashboard** – Save schemes and track eligibility

MARKET ANALYSIS

Target users include:

- Students seeking scholarships
- Farmers seeking agricultural support
- Small business owners
- Low-income families
- Senior citizens

Potential impact: **Millions of citizens across the country**

The platform can be used through:

- Web application
- Mobile devices
- Voice assistant interface

SDG ALIGNMENTS

Our project supports the following **Sustainable Development Goals**:

- SDG 1 — No Poverty
- SDG 3 — Good Health and Well-being
- SDG 4 — Quality Education
- SDG 10 — Reduced Inequalities

By improving access to welfare schemes, the platform promotes **inclusive development**.

FINANCIAL ESTIMATION

Technology Stack

Frontend:

- React
- Tailwind CSS

Backend:

- Node.js / Express

Database:

- SQLite

AI Integration:

- Google Generative AI

Estimated cost mainly includes:

- AI API usage
- Cloud hosting
- Maintenance and scaling

CONCLUSION

Government Scheme Navigator transforms a complex process into a simple experience.

Benefits:

- Easy scheme discovery
- Personalized recommendations
- Multilingual accessibility
- AI-powered assistance

Goal: Ensure every eligible citizen receives the benefits they deserve.
